CMMS AFFECT CLASSIFICATION PARITIES

It is important that you have your CMMS up to date for accuracy of Classification parities. Please note that the classifier in some instances may need to change parity on the hand held to classify your animal. However this change is not a permanent record. The DAFM system will only accept you the breeder to record the animal parities on the CMMS system.

SENDING IN DRY OFF DATES IS CRITICAL FOR ACCURATE MILK RECORDING DATA AND GENERATION OF YOUR ANNUAL HERD REPORT.
